**Results of PT and PTA Program Textbook Survey**

In March of 2010, the Federation of State Boards of Physical Therapy (the Federation, FSBPT) sent a survey to all accredited PT and PTA education programs in the United States requesting information about the textbooks currently used by the programs in the education of physical therapist and physical therapist assistants. The purpose of the survey was described to academic programs as a method of ensuring that the reference library maintained by the Federation and used in the development of the National Physical Therapy Examination (NPTE) reflects textbooks currently in use in PT and PTA education programs.

In all exhibits and appendices, textbook frequencies include textbooks with the same title, but with different edition numbers and International Standard Book Numbers (ISBNs). This technique was used because some PT and PTA programs reported using older editions or textbooks rereleased with eBooks. Collapsing frequencies across different versions of the same textbook succinctly identifies which titles are being used most frequently by the programs.

A total of 131 PT programs (65%) and 162 PTA programs (69%) responded to the request for textbook data (see Exhibit 1). The greatest number of textbooks used by a responding PT program was 94; the least, 2. For responding PTA programs the greatest number of textbooks used was 33; the least, 2. On average, 38 textbooks were used in PT programs, and 17 textbooks were used in PTA programs.

**Exhibit 1. Summary of Textbook Use by Survey Respondents**

Program Type	# of Programs Contacted	# of Programs Responding	Response Rate	Minimum # of Textbooks Reported by Programs	Maximum # of Textbooks Reported by Programs	Average # of Textbooks Reported by Programs	Median # of Textbooks Reported by Programs
PT	201	131	65%	2	94	38	36
PTA	236	162	69%	2	33	17	16

Exhibit 2 summarizes the number of textbooks used in PT and PTA programs. A total of 17 textbooks were used in 51 or more PT programs, and 13 textbooks were used in 51 or more PTA programs. Similarly, 8 textbooks were used in 41-50 PT programs, and 2 were used in 41-50 PTA programs. Overall, 14 textbooks were used in 40% or more of the PT programs in the sample, while 10 books were used in 40% or more of the PTA programs responding to the survey.

**Exhibit 2. Frequency of Programs Reporting Use of Different Numbers of Textbooks**

# of Programs Using Textbook	# of Textbooks Used by PT Programs	# of Textbooks Used by PTA Programs
51+	17	13
41-50	8	2
31-40	10	7
21-30	24	9
11-20	52	14

Lists of frequently used textbooks (used by at least 40% of the programs that responded to the survey) were assembled for each program type. Exhibit 3 lists the most frequently used textbooks across all PT programs, and Exhibit 4 lists the most frequently used textbooks across all PTA programs.
